Arnav Raj

Demo resume for TalNex: the projects below are TalNex test apps

Email: arnav.demo@talnex.test | GitHub: github.com/arnavraj-7 | New Delhi, India

Final-year student who builds small, useful web apps end to end: plain JavaScript front ends, Node.js serverless APIs and deployments on Vercel.

Education

B.Tech in Computer Science and Engineering, Example Institute of Technology, 2022 - 2026 | CGPA 8.4

Projects

TinyTools - everyday web tools

Live: https://talnex-honest.vercel.app | Code: https://github.com/arnavraj-7/talnex-planted-honest

- Added guest sign-in so people can start using the tools without creating an account.
- Built a currency converter between US dollars, euros, pounds and Indian rupees that shows a clear message for an empty, non-numeric or negative amount.
- Built a todo list where you can add, tick off and delete items, and it is still there after a page reload.

ShelfMate - reading tracker

Live: https://talnex-shelfmate.vercel.app | Code: https://github.com/arnavraj-7/talnex-planted-shelfmate

- Add, edit, search and delete books, and filter the shelf by Want to read, Reading or Finished.
- Rate finished books from 1 to 5 and see the average rating; the shelf is saved in the browser.
- Added a one-click Export CSV of the whole shelf and a yearly reading goal with a progress bar.

NoteBox - quick notes

Live: https://talnex-partly-works.vercel.app | Code: https://github.com/arnavraj-7/talnex-planted-partly-works

- Built a notes page where you add notes with a title and text, edit or delete them, and search them as you type.
- Added pinning, so a pinned note moves to the top of the list with a Pinned label.

CaptionIt - AI photo captions

Live: https://talnex-fake-claim.vercel.app | Code: https://github.com/arnavraj-7/talnex-planted-fake-claim

- Built an AI captioning app: upload a photo and it writes a caption describing it.

Skills

JavaScript, Node.js, HTML, CSS, REST APIs, Vercel serverless functions, Git, SQL, Python
